CHAYAN KAYAL

Bengal, West Bengal, INDIA chayankayal03@gmail.com +919002137577 in/chayan-kayal

SUMMARY

Final-year B.Tech Cyber Security student with experience in SIEM, incident response, and IDS/IPS (Suricata). Skilled in log analysis and network security, seeking a SOC Analyst role.

EXPERIENCE

Security Analyst Intern

Blackperl **January 2026 - April 2026, Bengaluru East, Karnataka**

- Utilized digital forensic techniques to investigate security alerts and support response actions.
- Conduct 5+ threat intelligence reports and 24+ comprehensive quality analyses of the laboratory processes.
- Security Monitored over 1200 network and endpoint events monthly using Security Monitoring Tools (e.g., Splunk, QRadar) to detect anomalies, leading to a 24% reduction in incident response time during the 3-month internship.

BRUT Security **June 2025 - August 2025, Murshidabad, West Bengal**

- Engaged in hands-on learning and working on projects relevant to Digital forensics and Incident response.
- Designed and executed 5+ laboratory scenarios based on operational requirements to support testing, analysis, and validation activities.
- Developed 3+ Python scripts to automate malware analysis and improve threat detection efficiency.

SKILLS

1. SIEM Monitoring & Log Analysis
Using tools like Wazuh, Splunk, and Elastic SIEM to analyze security logs and detect threats.
2. Incident Response Handling
Understanding the incident lifecycle, triaging alerts, and responding to security incidents.
3. MITRE ATT&CK Mapping
Using the MITRE ATT&CK framework to identify attacker tactics, techniques, and procedures (TTPs).
4. Threat Detection Engineering
Creating detection rules using Sigma and writing detection logic for attacks.
5. Log Collection & Security Monitoring
Collecting and analyzing logs from endpoints, servers, and networks.
6. Threat Hunting Fundamentals
Proactively searching for threats using logs, hypotheses, and indicators of compromise.
7. YARA Rule Creation for Malware Detection
Writing detection signatures with YARA.
8. Endpoint Monitoring & Telemetry Analysis
Using tools like Sysmon to analyze process and system activity.
9. Digital Forensics & Artifact Analysis
Investigating Windows artifacts like Prefetch, SRUM, registry, and memory data.
10. Vulnerability Management Basics
Understanding vulnerability scanning and risk prioritization using tools like Tenable Nessus.

PROJECT

CryptoPayWeb – "A secure AI-enabled banking and payment platform."

The Neotia University • September 2025 - November 2025

- Designed a secure payment system with authentication and AI-driven fraud detection.
- Conducted 1 threat analysis and vulnerability assessments, identifying and mitigating security risks to enhance platform resilience.
- Developed and simulated 5+ attack scenarios, improving system response accuracy and strengthening overall security posture.

SecureShare – "Share your data securely"

The Neotia University • March 2025 - May 2025

- Developed SecureShare, a cryptography-based data-sharing application with key generation and end-to-end encryption for secure transmission.
- Built SecureShare using cryptographic techniques, implementing key generation and end-to-end encryption to ensure data security.
- Designed SecureShare with encryption, key management, and end-to-end workflows to protect sensitive data during transmission.

EDUCATION

B. Tech in Computer Science and Engineering with Specialization in Cyber Security

The Neotia University • South 24 Parganas, West Bengal, India • August 2022 – Present • 8.99

CERTIFICATIONS

BlackPerl Certified Advance Defender (BCAD)
Blackperl • August 2025 – December 2025

Digital Forensics & Incident Response
CyberWokes • December 2024

Intrusion Detection & Prevention
WEBEL • June 2024 – July 2024

INVOLVEMENT

Operational Executive Committee head
The Neotia University • March 2025 – November 2025
